EXPERIENCE

Appdid technologies Pvt Ltd
May 2025 - Present

Senior Software Developer — *Thane, Maharashtra*

- Developed and maintained PHP/Laravel backend services for a cloud-hosted real estate SaaS platform used by thousands of customers.
- Optimized MySQL queries and implemented Redis caching, reducing query execution times by over 25%.
- Designed RESTful APIs, middleware and reusable Laravel services supporting buyer workflows, CRM operations and customer-facing features.
- Developed and integrated Laravel REST APIs with Flutter mobile applications for mobile functionality and backend data management.
- Worked with AWS EC2, S3 and supported Docker-based application deployment workflows.

Nimap Infotech
Apr 2024 - Apr 2025

Software Developer — *Mumbai, Maharashtra*

- Integrated Razorpay and Easebuzz payment gateways, improving payment completion rates by approximately 15%
- Designed modular Laravel services, reusable components and REST APIs to improve maintainability and application scalability.
- Implemented Laravel queues and background jobs for asynchronous processing and improved application reliability.
- Developed database-driven business modules, authentication workflows and third-party API integrations.
- Participated in code reviews, automated testing, technical planning and Docker/AWS deployment workflows.

Parasight Solutions
Oct 2022 - Feb 2024

PHP Developer — *Kalyan, Maharashtra*

- Developed ERP, School Management and business applications using PHP, Laravel, Yii2 and CodeIgniter.
- Built RESTful APIs and backend integrations consumed by web and mobile applications.
- Developed Flutter mobile applications and integrated PHP/Laravel APIs for mobile features and backend communication.
- Executed role-based access control (RBAC) to allow admins to assign roles and permissions.
- Applied authentication, authorization and workflow automation modules while collaborating with designers, QA engineers and clients.

PROJECTS

- **Gwuest App** *(Laravel, AdonisJs, Mysql, Flutter):*
  - Developed a multi-service platform integrating food ordering, gift ordering, bedding/rental services, and ride booking modules into a single application.
  - Built and integrated scalable APIs and backend functionalities to support seamless order management, rental workflows, and ride-booking operations across multiple services**.**
- **CA Stock Audit – Auditing Software for Chartered Accountant** *(Laravel, Mysql):*
  - Built backend functionalities in Laravel to support large-scale warehouse auditing workflows,
  - developed bulk data import features enabling users to upload complete datasets in a single operation.

EDUCATION

Bachelor of Science in Information Technology **2019 - 2022**
(B.Sc IT)
Mumbai University - CGPI: 8.87 *Maharashtra, India*
